

## Key Vocabulary

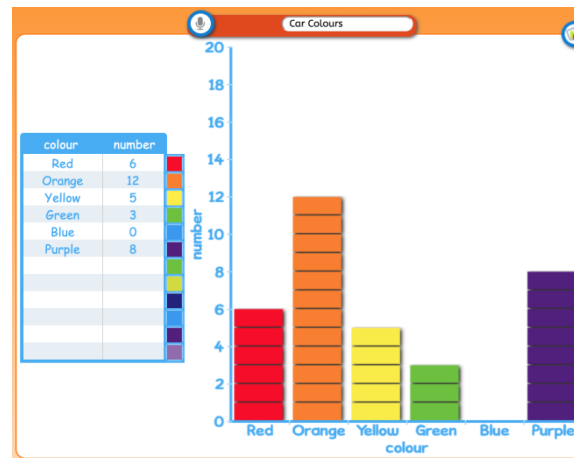

<b>Information</b>	<b>Information</b> is what we can understand from looking at <b>data</b> .
<b>Data</b>	Data can be numbers, words or figures.
<b>Search</b>	To find something by looking on the internet
<b>Label</b>	Labels can be used to place objects into <b>groups</b>
<b>Group</b>	The same objects can be put into groups, depending on their <b>properties</b>
<b>Properties</b>	Objects have different features that we can choose to <b>label</b> them by.
<b>Tally</b>	When you make marks on a <b>tally</b> chart, you chunk them into groups of five.
<b>Pictogram</b>	<b>Information</b> represented by using pictures. You can count the pictures to work out how many you have of each object.
<b>Block Diagram</b>	A <b>block diagram</b> is a way of representing data. It is similar to a <b>pictogram</b> , but blocks are used instead of pictures.

There are lots of ways to represent data. Using Tally Charts, Block Diagrams and Pictograms we can answer questions, count and group information.

## Tally Chart

## Block Diagram

## Pictogram
